A GLOBAL CATEGORY LEADER

CDN is a global category leader in kitchen measurement tools, known for quality and innovation for over 35 years.

Our measurement tools range from the basic to the unique. CDN has the right instrument to help you streamline your operation — from receiving product to cooking, storing, serving and cleaning.

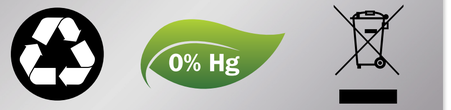

Foodservice professionals rely on CDN products, which are used in over 20,000 foodservice locations worldwide, including large international coffee and restaurant chains.

certified WBENC WOMEN'S BUSINESS ENTERPRISE

CDN was named "Best Overall Company" in its category by the prestigious Stevie Awards for Women in Business. We are also a certified member of the Women's Business Enterprise National Council (WBENC), providing additional benefits to our customers.

SOCIAL RESPONSIBILITY

CDN strives to maintain a balance between the economy and the ecosystem by choosing innovative technologies and programs that reflect our sensitivity towards social, cultural, economic, and environmental issues.

SUPERIOR QUALITY

All stainless steel is not the same. CDN thermometers are made of a premium grade stainless steel, which is superior to the stainless used in many other thermometers. CDN bimetal thermometer stems are welded to a calibration nut. Less expensive thermometers are only pressed together. The dimple in the stem of our bimetal thermometers indicates the place where the temperature coil is welded to a special bushing and where you will get the most accurate reading. This extra measure provides an additional degree of stability and accuracy, and is unique to CDN. National Sanitation Foundation is an approval agency that certifies that thermometers bearing the NSF® mark are manufactured to high commercial standards. Because of higher listing costs, only a select number of our thermometers carry the NSF® mark. However, all our dial thermometers are manufactured to NSF® standards in an NSF® Certified facility. We use an incoming inspection program based on military QC standard MIL-O9858.

BioCote®

BioCote® Antimicrobial properties are built-in to inhibit the growth of bacteria that may affect this product. According to EPA guidelines we cannot claim that the antimicrobial properties in this product protect users or others against bacteria, viruses, germs, or other disease organisms. This product does not protect users or others against food-borne bacteria. Always clean and wash this product thoroughly before and after each use.

Batteries included with all electronic products.

5-YEAR LIMITED WARRANTY

All products have a five-year limited warranty unless otherwise noted. **5-Year Limited Warranty:** Any instrument that proves to be defective in material or workmanship (excluding batteries) within five years of original purchase will be repaired or replaced without charge upon receipt of the unit prepaid at: CDN, PO Box 10947, Portland, OR 97296-0947. This warranty does not cover damage in shipment or failure caused by failure to adhere to the accompanying instructions, inadequate maintenance, normal wear and tear, tampering, accident, misuse, unauthorized modification, obvious carelessness or abuse. CDN shall not be liable for any consequential or incidental damages whatsoever.

BioCote – A CDN Advantage

BioCote

CDN NSF-Certified thermometers and scales with food-safe plastic components that come in contact with food are manufactured with BioCote — the only antimicrobial technology in the world to be HACCP certified. CDN understands the importance of cleanliness and food safety in professional kitchens.

What does BioCote do?

BioCote technology provides long-lasting antimicrobial protection to a product by creating a surface on which microbes cannot survive. BioCote's unique HACCP certification signifies the independent assessment and verification of stringent quality control procedures.

What are the benefits of BioCote?

CDN products treated with BioCote offer many benefits, such as reducing bacteria by up to 99.99% and cross contamination. It's also proven effective against mold and certain viruses.

How does BioCote work?

BioCote is added to the plastic at the time of manufacturing. BioCote technology protects products by binding with the plastics, inhibiting microbial growth.

Can we quantify the benefits of BioCote?

Yes. BioCote is proven effective against a wide range of microbes such as odor-causing and staining bacteria, mold and fungus.

- Reduces microbes by up to 99.99%
- Significant reductions in microbes within 15 minutes
- Up to 99.5% reduction in just 2 hours

How long do the benefits of BioCote last?

BioCote works continuously for the expected lifetime of a product.

Contact us with questions or to find the models that are right for your operation.

CDN e-blasts have an unusually high average open rate of 35% – way higher than most manufacturers.

These continue to be a powerful tool for promoting new and bestselling products, along with industry trends and CDN's competitive advantages.
